<b>Project Title</b>	Moving from networked to patchworked society: motivational underpinnings and societal consequences.
<b>Project description</b>	<p>The main goal of the project is to investigate the role of electronic media in the social and cultural transformation, which, in our opinion, consists in moving away from an open society, that enables functioning in flexible social networks, towards a "patchwork" society based on various types of closed (micro) groups, with a strong identity, strong intra-group ties and their own epistemic realities. This process, leading to social fragmentation, has serious social implications, such as distrust of the state and its institutions (and the authorities in general), low level of social consensus, low level of participation and disobedience. The project focuses on understanding the role of motivational, cognitive, social and cultural factors that shape this process.</p> <p>More information can be found on the project website: <a href="https://digipatch.eu">https://digipatch.eu</a></p>
