

JAGIELLONIAN  
UNIVERSITY  
IN KRAKÓW

## INVITATION

The **ChildLab** at the Institute of Psychology at the Jagiellonian University in Krakow, Poland, celebrating its 10th anniversary this year, invites you to participate in the symposium *Interaction, Communication and Mental Coordination: How Social Understanding Develops*.

During the symposium, issues related to social understanding development will be discussed by some of the most distinguished psychologists, philosophers and psycholinguists such as, among others, Ingar Brinck, Richard Moore, Hannes Rakoczy and Paula Rubio-Fernandez. In recent years, it has become generally accepted that child's participation in social interactions is a developmental foundation of understanding that people's behaviour is caused by their desires, knowledge and beliefs about reality, and not by reality itself. The question of whether experiences gathered during interactions with caregivers, siblings and peers are of key importance for the development of understanding of oneself and others, now, in the ongoing scientific debate, becomes the question about the mechanism and trajectory of changes in social understanding.

The symposium will take place on **April 16, 2021 from 9am to 2:30pm CET, on-line**. Please complete [the registration form](#) by April 14, 2021 to participate in the symposium. The program of the symposium and the link to access the symposium will be sent to the e-mail address provided in the registration form.

We hope that the symposium will become a platform for discussion of important issues related to the development of social understanding in the light of contemporary theoretical concepts and research results. We cordially invite you to participate in this event.

On behalf of all the ChildLab members,

prof. Marta Białecka-Pikul

Head of ChildLab  
Institute of Psychology  
Jagiellonian University, Krakow
